

Specifications of ZLJ series Belt Joint Vulcanizing Machine:

A=length of platen along the belt  
 B=width of platen across the belt on the bias  
 C=Right angle dimension across the belt, plus edge overlap.  
 D=Bias angle (0° /18° /20° /22° .....ect)  
 E=Max Splice length

Specifications of ZLJ series Belt Joint Vulcanizing Machine							<u>D=18 degree</u>
